

## **CoDA Service Conference (2017)**

### **Motion Form**

**Committee: Colorado VE**

**Date: 8/23/17**

**Motion Number: 1**

**Revision #: 1**

**Revision Date: 9/6/17**

### **Result (data entry purposes only)**

---

#### **Motion:**

**We move that:**

**1a) Add a new "Pattern and Characteristic" under 'Low Self-esteem Patterns':**

**“Codependents often guess at what normal is.”**

**1b) Upon approval, this will be added to all the "Patterns and Characteristics" under subheading of 'Low Self-esteem Patterns'.**

**Intent:**

**To clarify questions new CoDA members frequently ask and express confusion regarding this issue and to be included with all Patterns and Characteristics of Codependents to avoid this confusion.**

---

**Remarks: This seems to be a common thing within our fellowship and wanted it to be reflected in CoDA's literature.**

**This motion requires changes to: (please check any that apply)**
